

# Earth Day, Chapter 1

Ms. Green stood by her desk and said, "It is Earth Day! Earth is	14
our home. It's the only place we have to live. We can't just move	28
to a new place to live if we don't take care of the world. On this	44
day we think about how much we love the world and what we	57
are able to do to save it. We can stop doing things that hurt the	72
world. There are some things we need to start doing to help it.	85
We can't save the world all alone, but don't worry. Everyone can	97
find some ways to help save the world." Ms. Green said, "Our day	110
is going to be full of special things. We are going to watch a	124
special show, make a special craft, eat a special snack, and do	136
some other special things. Our goal is that by the end of the day	150
you will know lots of ways you are able to help save the world."	164
