

Earth Day, Chapter 1

Ms. Green stood by her desk and said, “It is Earth Day! Earth is our home. It's the only place we have to live. We can't just move to a new place to live if we don't take care of the world. On this day we think about how much we love the world and what we are able to do to save it. We can stop doing things that hurt the world. There are some things we need to start doing to help it. We can't save the world all alone, but don't worry. Everyone can find some ways to help save the world.” Ms. Green said, “Our day is going to be full of special things. We are going to watch a special show, make a special craft, eat a special snack, and do some other special things. Our goal is that by the end of the day you will know lots of ways you are able to help save the world.”
